Subject: Gold King Mine Quick Bullets

How do these look to cover the quick update inquiries:

- [REDACTED] Region 6 and 8 are working together with state and local stakeholders to quickly and appropriately respond to the Gold King Mine Incident that originated near Silverton, CO.
- [REDACTED] Region 6 has deployed and EPA OSC and contractors to Farmington to collect water samples from the waterways potentially affected by the Gold King Mine incident.
- [REDACTED] The samples will be analyzed for TAL Metals, Mercury, and pH.
- [REDACTED] Specific sample locations are being identified based on drinking water intakes and high risk locations.
